There is the question of Mozart's death, his friends and acquaintances surrounding him, forgers who murder to hide their crimes, safes opened centuries later to reveal literary masterpieces, executions by quillotine in the 18th century - a period of astonishing contradictions, many of them stranger than fiction.

Dr. Slater will speak about these unusual events from the time of Mozart and from the present that also play a role in his mystery novel "*Night Music*", a recently released book, which has just been made into a movie by the same name.

Dr. Slater is a captivating story teller and renowned pianist, displaying a mastery of communication and musical expertise. You will be delighted with his presentation.

*Piano CDs by the author and copies of "Night Music" will be available at the event.*
